Art Unit: 3622

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 7-10, 11-13 and 22, drawn to methods of searching and purchasing an item from a retailer, classified in class 705, subclass 36.
 - II. Claims 14-21, drawn to establishing and reconciling a budget classified in class 705, subclass 30.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as establishing and reconciling a budget. See MPEP § 806.05(d).
3. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as purchasing an item from a retailer that has satisfied a search criteria. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Since the examiner knows from past experience that an election will not be made by telephone, this restriction is proper under MPEP 812.01.
